Sini

Designed by Tanju Özelgin, Sini takes its inspiration from tradition, blending a modern design language with the basic function of a coffee table. Featuring a metal tray top, Sini expresses its traditional influences openly while presenting contemporary characteristics through its modern structure of metal rods and a solid wood base.

The set consists of three different Sini tables, offered in three different diameters and three different heights. The largest model serves as a sturdy and visually striking coffee table. The medium-sized version functions as an occasional table, ideal for placing next to a coffee table as a drink table. The smallest diameter model is also the tallest, making it a stylish side table.
