Dot

Focusing on the training and seminar rooms of companies and social areas like cafes and restaurants, Dot stands out as a chair series with functional solutions in a minimal form.

Having an optional armrest in its four-legged alternative, the seat can be a wood shell or an upholstered one, according to the user's choice. Following a fluid line, the back of the shell finalises with an elliptical cut. Having an integrated cushion in the backrest, revealing an iconic look with this detail, also it provides a comfortable back support for the user.

Product Details

While the front legs are leaning perpendicular to the floor, back legs have an angular line inclined outwards.

All of the materials used in the production of the chair; colours, textures and materials preferred by the architect or the user, expose a great coherence within the design language of the space.
