spaces
that care.

healthcare

30 years of global experience

For over 30 years, B&T Design has been developing functional, high-quality solutions for interior projects worldwide.

With extensive experience in **healthcare environments**, we deliver solutions that respond to **intensive use, hygiene requirements** and **long-term performance** expectations.

Inspiration • Craft • Materiality • Function • Care

hygiene and durability as priorities
antibacterial surfaces, wear-resistant
materials, easy-to-clean fabrics

certifications & production standards

B&T Design's production operates across a total of **25,000m²**, developed to support **healthcare projects** of **varying scales** and **long-term use**.

All processes operate in line with **internationally recognized quality and management standards**, ensuring **consistency** and **controlled quality**.

Materials and upholstery options are selected to meet the **hygiene, durability** and **performance requirements** of healthcare environments.

Products meeting **AATCC standards** are widely specified in projects requiring intensive use.

recommended **fabric options** for intensive healthcare use

CAMIRA VITA

Heavy duty (100,000 rubs)
Antimicrobial
Waterproof
Flame retardant
51 color options

Vita is a leather-look vinyl, with a subtle surface grain effect and full matt appearance. It provides maximum protection for heavy duty end-use areas in sectors such as healthcare.

Vita does not contain phthalate plasticisers or heavy metals, yet remains soft, stretchy and pliable. It is available in a broad palette of 51 considered colourways

recommended **fabric options** for intensive healthcare use

SPRADLING- SILVERTEX

Heavy duty (300,000+ rubs)
PERMABLOK3® protection
Antibacterial / Antifungal
High fire resistance
66 color options

Spradling's strong commitment to the healthcare sector is manifested in the development of new technologies relating to finishes and treatments, to ensure that the performance of the coated fabrics exceeds the rigorous technical standards required for furniture used in a medical environment e.g. anti-bacterial; resistance to abrasion and staining; plus offering long-term protection against most hospital-acquired infections
